How Does It Work?

# Natural Food

NILMI facilitates relationships between smallholder farmers, communal landowners, and large businesses that are processors of sorghum products and other grains. The business model involves partnering with communal landowners and smallholder farmers in commercializing the use of their land. Our current focus area is the production of sorghum, white maize, soya beans, and cash crops ( spinach, cabbage, and potatoes.

HELPING YOU EAT HEALTHY EVERYDAY!

# Our Competitive Advantage:

Ability to Integrate various factors of the current economic environment effectively to empower those who were previously disadvantaged.

Proven track record: Current aggregated land in excess of 4000ha in EC and KZN.

Proven track record: The collaborative partnership with the land owners to work as a unit (including participation of local tribal authority).

A 100% black-owned, woman-led, inclusive company for cross-sector collaboration.

*all for you!!*

## We activate community centered commercial farming through:

Our team's ability to mobilise rural communities.

Managing and resolving conflicts associated with community participation.

Applying a scientific approach to improved production yield through the adoption of new technologies while ensuring manageable commercial risk.

Ability to understanding the specific challenges and social intricacies of each of the communities in which we operates.
